

HR EMPLOYEE SURVEY RESPONSES

Data Analytics Project Documentation Template

PROJECT DOCUMENTATION

Template prepared for your HR survey analytics portfolio. Add your actual screenshots, findings, and recommendations in the marked spaces.

1. Project Overview

The HR Employee Survey Responses project analyzes employee survey data and presents the results through an interactive dashboard. This documentation covers the data preparation, analysis, visualization, findings, and recommendations.

Project Objectives

- Analyze employee survey responses and identify meaningful patterns.
- Summarize survey results using clear metrics and visualizations.
- Compare responses across relevant organizational categories.
- Present findings through an interactive and understandable dashboard.
- Develop data-driven insights and recommendations based on the results.

Tools Used

Excel • Power BI • [Add other tools actually used]

Project Workflow

Raw Survey Data → Data Cleaning & Preparation → Analysis → Visualization → Insights → Recommendations

2. Data Source

Dataset: **Employee Survey Responses**. Complete the details below using your actual dataset.

Dataset / File Name	Employee Survey Responses
Number of Records	[Insert actual count]
Number of Columns	[Insert actual count]
Main Analysis Fields	[Insert fields used]
Data Source / Origin	[Insert source]

3. Data Cleaning & Preparation

Document only the cleaning and preparation steps actually performed on the Employee Survey Responses dataset.

Step	Description / Action Taken
1. Data Inspection	[Describe how the raw data was inspected.]
2. Missing Values	[Describe how missing values were handled.]
3. Duplicates	[Describe duplicate checking/removal.]
4. Data Types	[Describe data type corrections.]
5. Text / Categories	[Describe standardization.]
6. Derived Fields	[Describe calculated/grouped fields.]
7. Final Validation	[Describe final checks.]

4. Data Analysis

Explain the calculations, comparisons, groupings, and descriptive statistics used to understand the survey responses.

- Descriptive statistics: [Insert measures used.]
- Category comparison: [Insert comparisons.]
- Response distribution: [Insert response categories.]
- Department analysis: [Insert department-level analysis.]
- Employee role analysis: [Insert role-level analysis.]

5. Dashboard — Overview

Insert your completed Overview screenshot here. Explain the KPIs, filters, charts, and main information presented.

[Write a short explanation of what this dashboard section shows and the main finding(s).]

6. Dashboard — Department

Insert your completed Department screenshot here. Explain how departments are compared and what response patterns are shown.

[Write a short explanation of what this dashboard section shows and the main finding(s).]

7. Dashboard — Report

Insert your completed Report screenshot here. Explain the summary information, survey results, and reporting visuals.

INSERT SCREENSHOT HERE

[Write a short explanation of what this dashboard section shows and the main finding(s).]

8. Dashboard — Employee Role

Insert this screenshot when the Employee Role section is completed. Explain how roles are grouped and compared.

[Write a short explanation of what this dashboard section shows and the main finding(s).]

9. Key Insights

Record only findings directly supported by your analysis.

1. [Insert key insight.]
2. [Insert key insight.]
3. [Insert key insight.]
4. [Insert key insight.]
5. [Insert key insight.]

10. Recommendations

Connect each recommendation directly to a documented finding.

1. [Insert data-driven recommendation.]
2. [Insert data-driven recommendation.]
3. [Insert data-driven recommendation.]
4. [Insert data-driven recommendation.]
5. [Insert data-driven recommendation.]

11. Conclusion

[Write a concise conclusion summarizing the results and value of the dashboard.]

12. Portfolio Notes

Optional: add public links to the Power BI dashboard, cleaned dataset, SQL queries, or Python scripts. Do not include confidential employee information or personally identifiable data.
